

Marsden Park wastewater services

We're building new wastewater infrastructure to support growth areas in Marsden Park.

This includes the Marsden Park Industrial Precinct defined by the [Department of Planning and Environment](#).

The work includes:

- a new wastewater pumping station on South Street
- a new wastewater pressure main along Grange Avenue, Carnarvon Road and North Street, Schofields

Can I connect?

Customers cannot connect directly to this new pumping station or pressure main.

If you would like to find out whether Sydney Water can provide you with a wastewater service, you'll need to engage a [Water Servicing Coordinator](#).

A Water Servicing Coordinator can lodge a Feasibility Application on your behalf to confirm whether you can connect to Sydney Water's wastewater network.
